SECOND REVIEW FORM

SYSTEM ARCHTECTURE:

The systems architect establishes the basic structure of the system, we propose a Hash code Solomon algorithm and a we can put a small part of data inlocal machine and fog server in order to protect the privacy. Moreover, based on computational intelligence, this algorithm can compute the distribution proportion stored in cloud, fog, and local machine, respectively. Through the theoretical safety analysis and experimental aluation, the feasibility of our scheme has been validated, which is really a powerful supplement to existingcloud storage scheme.
